

LOVEPREET SIDHU

lovepreet.sidhu3@student.kpu.ca · <https://lovesidhu.github.io/portfoliowebsite> · 778-908-3286 · Surrey, BC

SUMMARY OF QUALIFICATIONS

- Currently completing a Bachelor of Technology in Information Technology (Network Administration & Security) at Kwantlen Polytechnic University, with AWS Certified Solutions Architect – Associate and Cloud Practitioner credentials
- Proficient in enterprise networking (Cisco IOS, VLANs, OSPF/BGP, VPNs), cloud infrastructure (AWS VPC/EC2/S3/IAM, Terraform), and security operations (Splunk, Wazuh, SIEM, forensics tools); experienced in Windows/Linux server administration, automation (Ansible, Python, Bash), and IoT/embedded systems
- Delivered hands-on solutions including a cloud-based storage architecture (STaaS) using AWS and Spring Boot, a file integrity monitoring tool with Java and SHA-256 hashing, and an IoT plant monitoring system with Arduino and Embedded C++
- Strong communicator with experience translating technical concepts for diverse audiences from healthcare and logistics environments; demonstrated adaptability, time management, and customer-focused problem solving in fast-paced operational roles

TECHNICAL SKILLS

Networking & Security Infrastructure: Cisco IOS, VLANs, VPNs, IPv4/IPv6, OSPF, BGP, Firewall Policy, 802.1X, WPA3, Wi-Fi-6, RF Analysis, Nmap, Wireshark

Security Operations & SIEM: Splunk, Wazuh, SIEM, Autopsy, FTK, Endpoint Hardening

Cloud & Virtualization: AWS (VPC, EC2, S3, IAM, IoT Core), Terraform, CloudFormation, Docker, VMware, Hyper-V

Systems & Automation: Windows Server (AD DS, GPO), Linux (Ubuntu/CentOS), Ansible, Python, Bash

Databases & Tools: Java, PHP, Embedded C++, MQTT, Arduino, SQL (MySQL/MongoDB), RESTful APIs, Git, Postman, ERP (Odoo), Technical Documentation, and Ticketing Systems

EDUCATION

Kwantlen Polytechnic University – Bachelor of Technology – Information Technology Sep 2022 – Dec 2026 (Expected)

Specialization: Network Administration and Security

Certifications: AWS Certified Solutions Architect – Associate (November 2024) · AWS Certified Cloud Practitioner (February 2024)

PROJECTS

Smart Plant Monitoring System February 2026

Internet of Things and Apps

- Built Arduino system using Ultrasonic, Soil Moisture, RGB, Buzzer, and I2C LCD; programmed in Embedded C++
- Implemented priority alerts and real-time LCD displaying distance, moisture, and system status via I2C

File Integrity Monitoring Tool & Security/Forensics Lab March 2025

System Security & Digital Forensics

- Built Java-based FIM tool using SHA-256 hashing and WatchService API for real-time alerting. Deployed OSSEC HIDS on Linux VMs for log monitoring, file integrity, and rootkit detection. Validated detection accuracy and documented architecture for compliance handoff
- Designed multi-VLAN topology with Cisco IOS, OSPF, and Layer 2/3 segmentation. Conducted forensics on compromised VM using VirtualBox, Autopsy/FTK: reconstructed attack chain via Wireshark

STaaS Cloud-Based Smart Drive December 2025

Cloud Computing

- Architected secure AWS VPC with public/private subnets, NAT gateways, and bastion hosts
- Built Java Spring Boot backend integrated with S3, pre-signed URLs, and storage quotas
- Stack: AWS (VPC/EC2/S3/IAM), Spring Boot, Docker, MongoDB

EXPERIENCE

Vancouver Coastal Health – Porter October 2022 – Present

Vancouver, BC

- Facilitated patient transport and equipment management within a high-volume clinical setting, ensuring operational efficiency and safety
- Maintained clear communication with medical staff to prioritize urgent requests and minimize workflow disruptions

United Parcel Service (UPS) – Delivery Driver October 2021 – February 2022

Delta, BC

- Executed time-sensitive deliveries using logistics software and real-time tracking systems to meet strict deadlines
- Optimized delivery routes independently to maximize efficiency and maintain vehicle safety standards

BELL (Authorized Dealer)– Sales Representative

April 2018 – August 2021

Surrey, BC

- Assisted customers with mobile device setup, software troubleshooting, and 5G network plan selection
- Resolved technical inquiries regarding hardware specifications and connectivity issues to improve user satisfaction
- Maintained clear communication with medical staff to prioritize urgent requests and minimize workflow disruptions

TELUS (Authorized Dealer)– Field Sales Representative

April 2017 – March 2018

Surrey, BC

- Advised customers on fiber network upgrades and provided setup support for home connectivity solutions
- Educated clients on product features and installation processes, simplifying technical concepts for non-technical users

VOLUNTEER

Cystic Fibrosis Foundation – Event Support Volunteer

May 2025

Burnaby, BC

Supported logistics coordination and participant assistance to raise awareness and funds for Cystic Fibrosis research
