

LOVEPREET SIDHU

Surrey, BC V3S 1R8 | 778-908-3286 | lovepreet.sidhu3@student.kpu.ca | Portfolio Website: lovesidhuy.github.io/portfoliowebsite | LinkedIn: <http://www.linkedin.com/in/lovepreetssidhu> | GitHub: <https://github.com/lovesidhuy>

SUMMARY OF QUALIFICATIONS

- 4th-year Bachelor of Technology student in Information Technology with a specialization in Network Administration & Security at Kwantlen Polytechnic University, expected December 2026; AWS Certified Solutions Architect - Associate and AWS Certified Cloud Practitioner with hands-on experience configuring and securing enterprise networks, wireless systems, and cloud infrastructure through academic projects.
- Designed and implemented network authentication and security solutions in academic environments using Windows Server, Active Directory, NPS, RADIUS, 802.1X, Cisco IOS, and AWS networking services; applied structured testing and documentation practices to validate configurations.
- Delivered technical support and customer service in fast-paced clinical and telecom environments, troubleshooting issues and explaining technical concepts in simple terms to improve customer satisfaction.
- Gained leadership and communication experience through preparing technical reports, delivering project presentations, and mentoring team members, seeking to contribute networking and security skills in an IT Support, Network Operations, or Junior Systems Administrator role.

SKILLS

Networking & Security: Cisco IOS | Routing & Switching | VLANs | STP | OSPF | BGP | ACLs | NAT | 802.1X | RADIUS | EAP-TLS | TCP/IP | Wireshark | Nmap

Cloud & Infrastructure: AWS (EC2, VPC, S3, IAM) | Azure | Docker | VirtualBox | Terraform

Systems Administration: Windows Server | Active Directory (NPS, AD CS, Group Policy) | Linux (Kali, Ubuntu)

Scripting & Development: Python | Java | Bash | SQL | Boto3

User Support: Windows OS | macOS | mobile devices | remote support

Digital Skills: Microsoft 365 | Git | CRM/ERP Systems | POS Software | Scheduling Systems | Ticket Documentation

Professional Competencies: Training & Mentoring | Customer Service | Team Collaboration | Technical Troubleshooting | Documentation | Attention to Detail | Communication

EXPERIENCE

Porter | *Vancouver Coastal Health*

October 2022 – Present | Vancouver, BC

- Coordinate time-sensitive patient transport across 30+ hospital departments using scheduling systems and mobile devices in a high-volume acute care environment, consistently supporting on-time clinical appointments and reducing transport delays.
- Collaborate with multidisciplinary clinical staff to maintain safe and efficient transport workflows while ensuring compliance with hospital safety, infection control and operational protocols.
- Train and mentor new team members on department workflows, equipment handling, and safety procedures to improve onboarding consistency and maintain service standards.
- Identify recurring equipment and system issues, maintain accurate daily transport logs, and propose workflow improvements that enhanced operational efficiency across the department.

Sales & Technical Support Representative | *Bell Canada (Authorized Dealer)*

April 2018 – August 2021 | Surrey, BC

- Diagnosed and resolved iOS/Android device, Wi-Fi/Bluetooth, and mobile network issues across 20+ daily client interactions, reducing repeat support visits by improving first-call resolution.
- Exceeded monthly sales targets by 15%+ through consultative selling of smartphones, tablets, and Bell 5G network plans tailored to customer needs.
- Explained technical concepts such as 5G architecture and device specifications to non-technical customers, reducing post-sale support inquiries by 25%.
- Maintained detailed customer records and device inventories using CRM and POS software in a fast-paced retail environment.

Field Sales Representative | *The Acquisition Group – TELUS Authorized Dealer*

April 2017 – March 2018 | Surrey, BC

- Ranked in the top 10% of sales representatives through door-to-door and event-based sales, earning multiple performance recognitions in TELUS and Koodo competitions.

- Increased upgrade conversions by 15% by recommending personalized TV, internet, and smart home solutions based on customer usage patterns.
- Provided hands-on setup and troubleshooting for streaming services and home connectivity devices, improving customer satisfaction and service adoption rates.

VOLUNTEER

Event Support Volunteer – Cystic Fibrosis Foundation – Walk to Make Cystic Fibrosis History, Burnaby, BC *May 2025*

- Supported event logistics and participant coordination for a large-scale fundraising walk, assisting with registration, route guidance, and on-site inquiries for 200+ participants.
- Contributed to the success of the event by helping with setup, teardown, and fundraising activities that supported cystic fibrosis research.

Event Technical Support Volunteer – *G1 Wireless (Bell Retailer)* *December 2023*

- Provided technical support during high-volume Boxing Day and holiday sales events by setting up mobile devices, transferring customer data, and resolving activation issues for 40+ customers per shift.
- Assisted with event-day operations including inventory tracking and troubleshooting, helping the store maintain smooth operations during peak periods.

EDUCATION

Kwantlen Polytechnic University | *Surrey, BC*

December 2026 (Expected)

Bachelor of Technology in Information Technology | Specialization: Network Administration & Security

Relevant Coursework:

Cloud Computing - Studied enterprise cloud infrastructure and security through IEEE research papers and hands-on AWS projects using VPCs, IAM, Docker, and automation.

Digital Forensics - Applied forensic investigation techniques and evidence analysis using Wireshark and Autopsy on network and endpoint systems.

Security of Wireless Systems - Explored 802.1X authentication, RADIUS, and WPA3-Enterprise through hands-on labs and wireless security projects.

Columbia College | *Vancouver, BC*

January 2017 – April 2019

Associate of Arts

Relevant coursework: Introductory CS Foundation — Introduction to the Internet & World Wide Web, Connecting with Computer Science, Psychological Explanations of Criminal Behaviour

PROJECTS

STaaS Cloud-Based Smart Drive | [GitHub](#) | *Cloud Computing* – Grade – 80%

September – December 2025

- Designed and deployed a secure AWS cloud storage environment using VPC segmentation, NAT gateways, bastion hosts, and IAM policies to improve network isolation and secure administrative access.
- Automated infrastructure operations using Python (Boto3), reducing manual configuration tasks and improving deployment consistency across environments.
- Containerized frontend and backend services with Docker and validated deployment functionality through live demonstrations and cross-environment test cases.

Stack: AWS (VPC, EC2, S3, IAM), Spring Boot, Docker, MongoDB, Python

Enterprise Wi-Fi Authentication System | [Technical Report](#) | *Security of Wireless Systems* – Grade – 90% *January – March 2026*

- Deployed an enterprise authentication infrastructure on Azure using Windows Server, Active Directory, and NPS to simulate a WPA2/WPA3-Enterprise environment with 802.1X and EAP-TLS.
- Enforced NPS policies and validated authentication behavior using event logs and Wireshark packet captures.
- Documented findings and presented the architecture and security implementation outcomes in a formal technical report and presentation.

Tools: Windows Server 2022, Active Directory, NPS, RADIUS, EAP-TLS, 802.1X, Wireshark, Terraform, Azure, AD CS
