SUMMARY OF QUALIFICATIONS

- 4th-year Bachelor of Technology student in Information Technology (Network Administration & Security) at Kwantlen Polytechnic University, expected December 2026; AWS Certified Solutions Architect – Associate and AWS Certified Cloud Practitioner with hands-on experience across cloud infrastructure, enterprise networking, authentication systems, and systems security.
- Proven ability to systematically isolate, troubleshoot, and resolve complex network and security faults within AWS infrastructure and 802.1X/RADIUS authentication pipelines; engineered optimized testing workflows to accelerate root-cause analysis and minimize system downtime.
- Commended for delivering high-quality customer service and operational efficiency in demanding clinical and telecom environments; expert at triaging critical tasks under pressure and translating complex technical concepts into user-friendly support.
- Demonstrated leadership and technical communication excellence by authoring comprehensive engineering reports, delivering professional presentations, and guiding peer teams through complex KPU projects, aiming to leverage these competencies to drive operational efficiency within the enterprise IT infrastructure and network security sectors.

SKILLS

Networking & Security: Network Troubleshooting | TCP/IP | VLANs | OSPF | BGP | 802.1X | RADIUS | EAP-TLS
| Cisco IOS | Wireshark | Nmap | Firewall Policies

Cloud & Infrastructure: AWS (EC2, VPC, S3, IAM) | Azure | Docker | VirtualBox | Linux (Ubuntu, Kali) | Windows Server (AD DS, AD CS, NPS, GPO) | Active Directory | Remote Desktop

Programming & Scripting: Java | Python (Boto3) | Bash | SQL/MySQL/MongoDB

Tools: Terraform | Git | Cisco Packet Tracer | Microsoft 365 | Agile/Scrum

Professional Competencies: Technical Troubleshooting | Root Cause Analysis | Documentation | Stakeholder Reporting | Team Collaboration | Client Communication | Attention to Detail

EXPERIENCE

Porter | *Vancouver Coastal Health*

October 2022 – Present | Vancouver, BC

- Coordinate time-sensitive patient transport across 30+ hospital departments using scheduling systems and mobile devices in a high-volume acute care environment, supporting efficient patient flow and adherence to clinical timelines.
- Collaborate with multidisciplinary clinical staff to maintain safe and efficient transport workflows while ensuring compliance with hospital safety and operational protocols.
- Train and mentor new team members on department workflows, equipment handling, and safety procedures to improve onboarding consistency and maintain service standards.
- Identify and escalate equipment or system discrepancies, maintain accurate transport logs, and contribute to workflow improvement initiatives supporting daily hospital operations.

Sales & Technical Support Representative | *Bell Canada (Authorized Dealer)*

April 2018 – August 2021 | Surrey, BC

- Diagnosed and resolved iOS/Android device, Wi-Fi/Bluetooth, and mobile network issues across 20+ daily client interactions, improving customer satisfaction and reducing repeat support visits.
- Exceeded monthly sales targets by 15%+ through consultative selling of smartphones, tablets, and Bell 5G network plans tailored to customer needs.
- Explained technical concepts, including 5G architecture and hardware specifications, to non-technical customers, reducing post-sale support inquiries by 25%.
- Processed high-volume transactions and maintained accurate inventory and customer records using POS and internal sales systems in a fast-paced retail environment.

Field Sales Representative | *The Acquisition Group – TELUS Authorized Dealer*

April 2017 – March 2018 | Surrey, BC

- Ranked as a top performer in door-to-door and event-based sales, placing in top 10% and earning recognition through multiple TELUS and Koodo sales competitions.

- Increased upgrade conversions by 15% by recommending tailored TV, internet, and smart home solutions based on customer requirements and usage needs.
- Provided setup assistance and troubleshooting support for streaming services, set-top boxes, and home connectivity solutions, improving customer satisfaction and service adoption.

VOLUNTEER

Event Support Volunteer – Cystic Fibrosis Foundation – Walk to Make Cystic Fibrosis History, Burnaby, BC *May 2025*

- Supported logistics coordination, participant assistance, and fundraising activities, contributing to a successful community event raising awareness for cystic fibrosis research.

Event Technical Support Volunteer – G1 Wireless (Bell Retailer) *December 2023*

- Supported high-volume Boxing Day and holiday retail events by setting up mobile devices, transferring customer data, troubleshooting activation issues, and assisting with event-day technical operations.

EDUCATION

Kwantlen Polytechnic University

December 2026 (Expected)

Bachelor of Technology in Information Technology | Specialization: Network Administration & Security

Relevant Coursework:

Cloud Computing - Studied enterprise cloud infrastructure, virtualization, cloud security, and distributed systems through IEEE research papers and hands-on AWS implementations involving VPCs, IAM, Docker, and infrastructure automation.

Digital Forensics - Applied forensic methodologies, evidence collection, and network forensics through investigations using Wireshark, FTK Imager, Autopsy, and forensic reporting techniques.

Security of Wireless Systems - Explored WPA2/WPA3, 802.1X, RADIUS/LDAP integration, secure roaming, and wireless access control through hands-on Wireshark labs and authentication infrastructure projects.

Columbia College

January 2017- May 2019

Associates of Arts

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

(November 2024) | [Credential](#)

AWS Certified Cloud Practitioner

(February 2024) | [Credential](#)

Command Line Course – Codecademy

(July 2023) | [Certificate](#)

PROJECTS

STaaS Cloud-Based Smart Drive | [GitHub](#) | *Cloud Computing* – Grade- 80.00 %

December 2025

- Designed and deployed a secure AWS cloud storage environment using VPC segmentation, NAT gateways, bastion hosts, and least-privilege IAM policies to improve network isolation and secure administrative access.
- Automated file lifecycle management and infrastructure operations using Python (Boto3), reducing manual configuration tasks and improving deployment consistency across environments.
- Containerized frontend and backend services with Docker and validated deployment functionality through live demonstrations and cross-environment test cases.

Stack: AWS (VPC, EC2, S3, IAM), Spring Boot, Docker, MongoDB, Python

Enterprise Wi-Fi Authentication System | [Technical Report](#) | *Security of Wireless Systems* – Grade - 90.00 % *March 2025*

- Deployed enterprise authentication infrastructure on Azure (Windows Server 2022, Active Directory, NPS) simulating a WPA2/WPA3-Enterprise environment with 802.1X network access control, EAP-TLS mutual authentication, and an internal Certificate Authority to eliminate password-based network access.
- Enforced NPS policies blocking legacy auth methods; validated authentication behavior through Event ID analysis and Wireshark packet captures comparing credential-based and certificate-based authentication traffic.
- Presented technical findings, architecture design, and security implementation outcomes through a formal project presentation and technical report.

Tools: Windows Server 2022, Active Directory, NPS, RADIUS, EAP-TLS, 802.1X, Wireshark, Terraform, Azure, AD CS
